Quality Fabrics

SYMBOLS

ClimaTec material is a comfortable, warm, lightweight material, fast drying and easy to maintain. The advanced micro fibres transport the body fluids and keep you comfortable in many weather conditions.

ClimatePoly fibre has thermal qualities and is easy to wash. The unique knitting methods result in a very fine-grained structure on the inside and an open structure on the outside. Moisture is transported optimally and quickly.

ComfortTec material is a very comfortable material. It keeps the body warm with its soft brushed inner.

MotionTec material is comfortable, lightweight and tight fitting because of the yarn used and the knitting technique. The fabric has a high stretchability because of the high level of elasticity in the product. It's functional and durable, perfectly suited for indoor sports.

TTS is a highly functional and durable material. Extremely suitable for strenuous exercise. The material is easy to wash which simplifies maintenance.

Sportpolyester has a thermal effect and is easy to wash, which simplifies maintenance. It protects against cold wind and is a great combination of a functional and durable product.

WovenTec increases the wearing comfort and provides a soft feel. The material has a luxurious appearance. WovenTec products are not only functional during sport activities but also perfectly suitable for presentations.

Coated articles with taped seams, including rain gear and all weather jackets, are finished with a special coating. Depending on the type of coating the articles are waterproof, windproof or water-repellent.

Marfil® is the brand name of a polypropylene fibre. Polypropylene is a thermal fibre with the lowest specific weight available. It is moisture resistant and moisture transportable. Polypropylene is 100% real colour, non-shrinking and recyclable. It gives perfect comfort to your feet and avoids skin irritation. Stanno specifically uses polypropylene for high quality sports socks.
